TECHNOPHILES

MOTIVATION

- ★ Bullying is a severe issue that needs to be addressed on priority.
- ★ Students go through immense emotional distress during in this situation.

INSIGHTS

- ★ Students lack awareness and understanding to deal with emotional distress.
- ★ Students hesitate to share their feelings.
- ★ Lack of knowledge to deal with bullying and overcoming it.

FINAL PROBLEM STATEMENT

15-18 year old students need awareness to deal with emotional distress caused by bullying.

HOW MIGHT WE?

How might we create awareness to deal with emotional distress ?

FINAL IDEA

Helping 15 - 18 year old students to analyse their feelings and understand the emotion behind them. Then dealing with that emotion effectively.

This was chosen because this solves the complete problem statement.

SOLUTION PROTOTYPE

Chill-Pill

Your Guide to withstand Emotional Distress

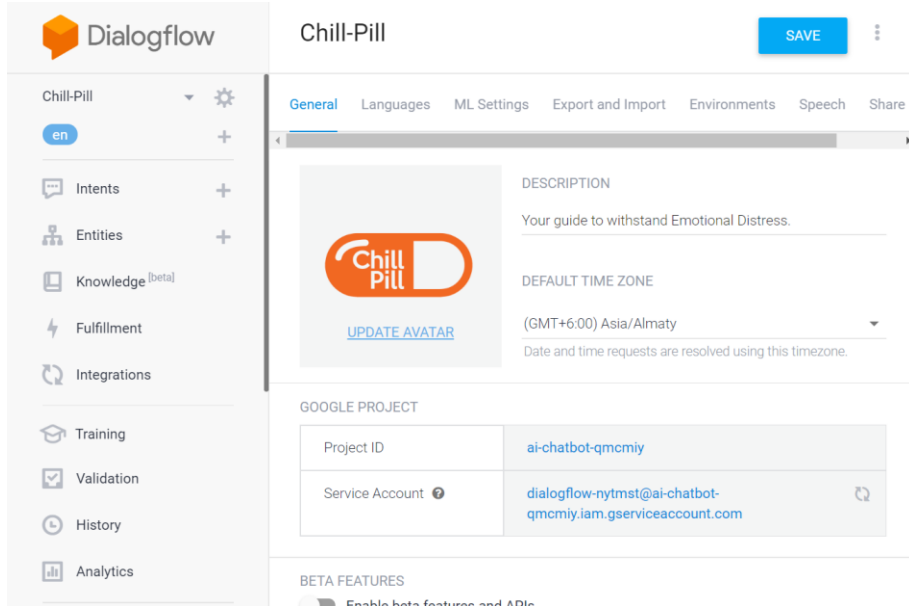

SOLUTION DEMO

Front page - Website

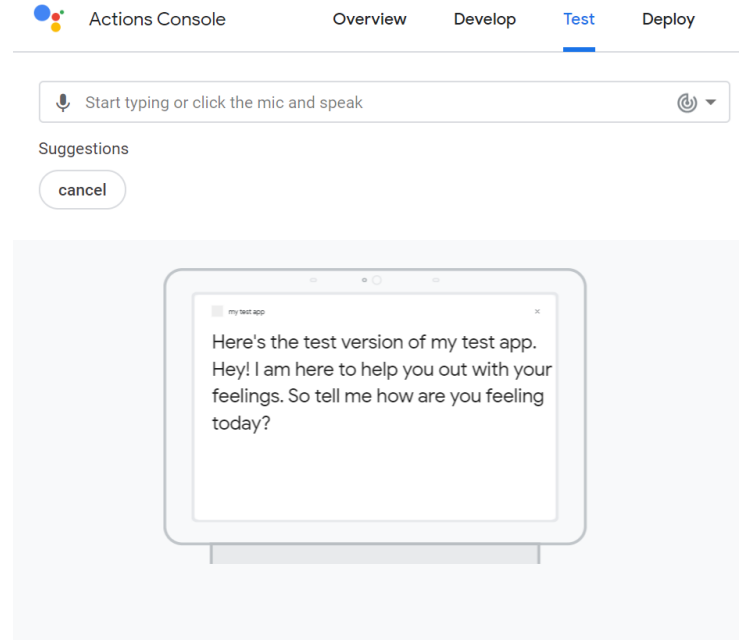

SOLUTION DEMO

The screenshot shows the Dialogflow console interface for a chatbot named "Chill-Pill". The left sidebar contains navigation options: Intents, Entities, Knowledge [beta], Fulfillment, Integrations, Training, Validation, History, and Analytics. The main content area is titled "Chill-Pill" and includes a "SAVE" button. Below the title are tabs for General, Languages, ML Settings, Export and Import, Environments, Speech, and Share. The "General" tab is active, displaying the chatbot's avatar (a pill with "Chill Pill" text), a description "Your guide to withstand Emotional Distress.", and a default time zone of "(GMT+6:00) Asia/Almaty". Below this is a table for Google Project information:

GOOGLE PROJECT	
Project ID	ai-chatbot-qmcmy
Service Account	dialogflow-nytmst@ai-chatbot-qmcmy.iam.gserviceaccount.com

At the bottom, there is a "BETA FEATURES" section with a toggle switch for "Enable beta features and APIs".

The screenshot shows the Actions Console interface. The top navigation bar includes "Actions Console", "Overview", "Develop", "Test" (which is highlighted), and "Deploy". Below the navigation bar is a text input field with a microphone icon and the placeholder text "Start typing or click the mic and speak". Below the input field is a "Suggestions" section with a "cancel" button. The main content area displays a preview of a chatbot interface on a laptop screen. The chatbot's message reads: "Here's the test version of my test app. Hey! I am here to help you out with your feelings. So tell me how are you feeling today?"
